January 25, 2012

il. O.

Representative Ken Weyler
Chairman
Fiscal Committee of the General Court
State House
Concord, NH 03301

Re: Dashboard - December 2011

Information

Pursuant to Chapters 223:6 (HB1) and 224:14 (HB2), Laws of 2011, the Department of Health and Human Services is providing this dashboard report, which, along with the quarterly report to the Fiscal Committee on expenditures for the Medicaid program, provides a status on demand for services in entitlement programs. The purposes of this dashboard are to:

- 1. Provide summary information on enrollments in several high cost programs managed by the Department
- 2. Monitor high level fiscal issues to ensure sufficient funding is available for entitlement programs and for programs intended by the legislature, and to
- · 3. Provide a summary of significant administrative and operations initiatives.

Explanation

Chapter 224:14 (HB2), Laws of 2011 provides certain restrictions and authorities for the Department of Health and Human Services to address potential budget shortfalls. Specifically, paragraph I requires prior approval of the Fiscal Committee of the General Court and Governor and Council (G&C) for any change to program eligibility standards or benefit levels that might be expected to increase or decrease enrollment in the program. Paragraph III authorizes the Commissioner to transfer funds, with the exception of class 060, benefits, within and among all accounting units within the Department, as the Commissioner deems necessary and appropriate to address present or projected budget shortfalls subject to the approval of the Fiscal Committee and G&C.

Individuals Enrolled For Services

As noted in Table 1, on the next page, caseloads continue to grow for most services, but at a much slower rate than was experienced in SFY 2011. For the six months ended December 31, 2011, the Department provided services to an average of 153,947 individuals per month. This represented an increase of 1.5% over the prior year. While unemployment for New Hampshire has been improving and caseload growth has slowed for most need-based programs, caseloads have not declined since the recession ended and the Department continues to serve an unprecedented number of clients. The economic realities of lower wages, fewer employee benefits, and increased part-time or temporary employment are factors that continue to influence service demand and delivery.

The Department's mission is "to join communities and families in providing opportunities for citizens to achieve health and independence." The largest programs managed by the Department are the food stamp and Medicaid programs, both of which are means tested programs serving low-income individuals. Caseload data contained in the dashboard represents individuals who have not achieved independence. "Poverty" is often defined as living at or below 100% of the federal poverty guidelines and "Low income" as those making less than 200% of the poverty threshold. A December news report by the Associated Press headlined "Census shows 1 in 2 people are

Table 1
Average Monthly Enrollment (Persons) Six Months Ended December 31,

poor or low-income. Nearly half of Americans are low-income as rising expenses, unemployment shrink middle class." The report states "Safety net programs such as food stamps and tax credits kept poverty from rising even higher in 2010." While there is debate as to what should be considered poor or low income, there is little disagreement that more people are earning less money and are qualifying for assistance.

The majority of individuals serviced by the Department fall into three groups and programs to help these individuals require different approaches with differing objectives.

- Permanently Disabled: Individuals who require long term care services,
- Temporarily Low Income: Individuals who lost employment and exhausted financial resources, but who have the ability to likely recover when jobs are available,
- Chronically Low Income: Individuals who must overcome impediments to gain financial independence

For the permanently disabled, which includes the developmentally disabled, frail elderly, and those with mental health issues, the objective is to help them maximize their abilities recognizing that for many, there will always be a need for long-term services and supports. For the Temporarily Low Income, the primary assistance needed is job opportunities. In some instances, when entire industries close down, re-training and new occupations may also be required. The most complex individuals are the Chronically low income, for which safe and affordable housing is becoming an increasing concern. Other statistical data includes the following.

- In New Hampshire, 6.6% of the population lived below the poverty line. This compares to 12.5% in Maine, 10.8% in Vermont, and 10.6% in Massachusetts. (Money/CNN).
- 10.3% of New Hampshire's population lacked health insurance versus 9.5% in Vermont, 9.4% in Maine, and 5.6% in Massachusetts. (Money/CNN).
- Three-quarters of federal welfare assistance went to single-parent families and the rise in out-of-wedlock childbearing and the increase in single parenthood are major causes of high levels of child poverty (Heritage Foundation).
- 36% of the unmarried fathers had a prison record and many long prison sentences are the result of victimless drug crimes and recommitment for minor parole offenses. (Brookings Institute)
- Achieving higher levels of education greatly reduces the incidence of living in poverty. (US Dept of Labor). New Hampshire ranks 4th nationally with 90.9% of adults with a high school diploma. The inverse is that 9.1% lack a high school diploma. (2011 New Hampshire State Health Profile, DHHS).

可透消

Representative Ken Weyler Page 3 January 19, 2012

Over half of all low-income children in the United States have a parent who works full time, year-round, but they work in low-wage jobs that typically offer few benefits (such as health insurance, paid sick leave, and retirement plans), little stability, and few opportunities for advancement. (National Center for Children In Poverty).

Medicaid Program

Medicaid is the largest and most costly program administered by the Department. Total Medicaid costs account for in excess of 70% of total Department costs. Medicaid caseloads have stabilized, but as noted previously remain at historic highs. Pursuant to SB147, the Department is implementing a managed care program to provide these services.

FANF Caseloads

Caseloads for Financial Assistance for Needy Families (FANF) has decreased by 14% from the first six months of previous year. Much of this reduction is related to termination of the two-parent program as part of the budget as well as changes to the criteria applied to other programs for eligibility.

Disabled Caseloads

Enrollment for Aid to the Permanently and Totally Disabled (APTD) continues to grow, although at a slower pace than last year, as noted in Table 1. Legislative changes to eligibility criteria has slowed the growth rate, but the application rate for potential clients continues at high levels.

Kaiser Foundation reports on a national level the elderly and disabled represent 25% of Medicaid enrollees yet account for 67% of the Medicaid cost. In a February 2011 report, Kaiser also noted "enrollment growth among the aged and disabled has exceeded the rate of growth of the overall US population, and has significantly contributed to higher Medicaid costs due to the high cost of medical care for this population." They identified the following factors behind this trend:

- "Baby boomers," are now in the 55-64 age range, when the likelihood of disability increases, and are beginning to expand the elderly population;
- New medical technologies and advances in pharmaceuticals that save, improve, and lengthen lives for many—and increase the number of people living with disabilities, many of whom rely on Medicaid to pay for their care;
- Increased ability to recognize and treat chronic conditions, particularly mental health problems, which may contribute to enrollment growth among the disabled.

Food Stamps

Approximately 15% of the US population is now receiving Supplemental Nutrition Assistance Program (SNAP) services. That's an increase of 74% since 2007. Recent news accounts estimated 40% of food stamp recipients are in households in which at least one member of the family earns wages, but earns wages below the eligibility threshold for food stamps. For the year 2010, the national average food stamp participation was 14.1%. New Hampshire was third lowest in the nation at 8.5%, behind Wyoming (6.9%) and New Jersey (8.0%).

Children In Out-Of-Home Placement

The number of children in foster care has declined by 7.3% versus the first six months of SFY2011 and by 21.0% from SFY2010. Similarly, the number of children in out of home residential care has declined by 24.0% versus the first six months of SFY2011 and by 29.9% from SFY2010. This is a result of two factors. For the past several years, DCYF and DJJS have made a concerted effort to reduce the number of out of home placements. These efforts have helped to keep children in their own homes with the provision of in-home services, and have decreased the length of stay in out-of-home placements as well. A second factor is the new, more restrictive, definition for CHINS and the transition home of the CHINS children who do not meet the new definition.

Representative Ken Weyler Page 4 January 26, 2012

Administrative Reorganization

The Department has been restructuring and downsizing the organization. In June 2009, 272 positions were vacant for a vacancy rate of 8.1%. At June 30, 2011, two years later, 581 positions (17.4%) were vacant. (Table D). 373 of these vacant positions were abolished by HB1 for SFY 2012-2013, thus permanently reducing the size of the organization. In SFY 2000, the Department had a budget of \$1.2 billion and approx. 2,811 filled positions, which equates to a staffing ratio of 2.4 employees per million dollars of budget. The SFY 2012 budget is \$1.9 billion and filled positions are 2,753 for a staffing ratio of 1.46. The downsizing of the organization comes at a time when the Department is also being tasked to implement elements of the Accountable Care Act and transformation initiatives required by the SFY 2012-2013 budget.

Summary

The Department has continually committed to making critical assessments of the current systems for management of care for clients meeting eligibility criteria and to transitioning delivery systems to more effective and efficient systems with the intended purposes of improving the value of the services delivered. These transitions require a clear definition of what constitutes a New Hampshire health and human service safety net, and difficult decisions on how best to deliver those services through new technologies and contractual arrangements with providers of those services. This message has been conveyed to staff, providers, advocates, and policy makers and is the basis for the SFY 2012-2013 budget and the change initiatives in four primary areas:

- 1. Care management for client enrollment in the Medicaid program
- 2. Reengineering service delivery systems
- 3. Investing in enabling technologies, and
- 4. Continuous process improvement

The more substantive long-term issues are to identify and address the root causes for individuals requiring supports. According to some sources, New Hampshire is the most livable state, one of the healthiest states, ranks high on the annual survey on children's well-being, among the most educated states, and has a high per capita income. What separates the low-income individuals receiving state services from the averages? High school drop-out rates, the causes of incarceration in the correctional system, the availability of jobs, which provide health and retirement programs, and choices made regarding healthy lifestyle options are linked. Effective solutions to the systemic issues will require a coordinated effort among several state agencies to identify and address the root causes.

Department of Health and Human Services Attachment To Monthly Dashboard Current Status of Significant Transformation Initiatives December 2011

Care Management

The budget requires a managed care model for administering the Medicaid program and its enrollees to provide for managed care services for all Medicaid populations throughout New Hampshire consistent with the provisions of 42 U.S.C. 1396u-2. The budget includes savings of \$16 million general funds for this initiative. The Department has developed a three-phased approach, which is consistent with the language of Chapter Law 125 (SB 147). Step 1 includes all Medicaid and Children's Health Insurance Program (CHIP) State Plan medical, pharmacy, and mental health services for all populations with the exception of Spend down populations. Step 2 will include specialty services for the long term care populations, including nursing home services and, considers the state's option to manage financing for specialty services for those dually eligible for Medicaid and Medicare. Step 3 will include the Medicaid expansion population under the Affordable Care Act. An RFP for these services was issued on October 17; vendor selection is scheduled for mid-January 2012; and the anticipated start date is July 1, 2012. The Mental Health Prepaid Finance & System Reform initiative has been discontinued since these services are now part of the Care Management initiative.

Children's Health Insurance Program (CHIP)

The budget requires a restructuring of the administration of the Children's Health Insurance Program. The Core CHIP Transition Team believes that transitioning the CHIP program into the Medicaid program, as a Medicaid expansion and inclusion in the Medicaid Care Management initiative, is the most practical and beneficial option for the State of New Hampshire and for the children on the program. The New Hampshire Healthy Kids Corporation continues to administer the program and is expected to do so until July 1, 2012 when the managed care program is implemented. A core CHIP transition planning team comprised of Division of Family Assistance and Office of Medicaid and Business Policy staff created work plan and identified key policy considerations including but not limited to system changes, staffing needs, customer service, budget, rules/State Plan amendment, stakeholder involvement, operations, brand, and marketing/outreach.

Medicaid Management Information System (MMIS)

On January 1, 2012, the Provider Enrollment function was implemented for the new MMIS and communication has been shared with all current Medicaid enrollment providers. Concurrent with the provider enrollment, User Acceptance Testing continues on other elements of the MMIS. It is anticipated that the significant functionalities will be implemented by July 1, 2012. The timing of the MMIS implementation will be integrated with the implementation of the Care Management program noted above so as to minimize the impact on providers and clients.

Mental Health, Transitional Housing

The budget transfers \$12 million general fund from institutional care to community based care to develop additional community capacity under the 10-year plan, develop private intensive community residential program on the campus of NHH, discharge THS patients to community providers and APS, and discharge continuing care patients to community providers and keep some on admissions units. An RFP was followed and a vendor selected. The Division of Community Based Care Services and NHH worked with the contractors and implemented an administrative transition plan. The contractor assumed responsibility for the program January 2012 as anticipated in the budget

Department of Health and Human Services Attachment To Monthly Dashboard Current Status of Significant Transformation Initiatives December 2011

Close Down New Hampshire Hospital "G" Unit

The "G" unit was closed effective June 30, 2011 and positions were abolished as required by the budget. Modifications are being made, such as carpet and flooring, to relocate E unit to the G unit space to allow for separation of children from adolescents.

Mental Health, Limitation on Services

RSA 135-C:13 is amended to limit admission to the state mental health services system and access to treatment and other services within the system to the amount of available appropriations. Community Mental Health Centers (CMHC) will conduct clinical assessments of applicants for services and prioritize delivery of services based on the severity of an individual's clinical needs. The Community Behavioral Health Association reviewed the impact of the new Statute with the Mental Health and Substance Abuse subcommittee of the HHS Oversight Committee and reported that no one had been turned away from services.

DDAA & CMHC Consolidation

The budget requires a consolidation of Developmental Disability Area Agencies and Community Mental Health Centers. Savings of \$1.8 million general funds are budgeted. The Bureau of Behavioral Health (BBH) requested a proposal from the Community Behavioral Health Association on how these changes will be operationalized, and a proposal was submitted to the Commissioner.

The Bureau of Developmental Services (BDS) developed a process for Area Agency participation in the development of a plan to generate the required savings. This plan has been developed and was submitted to the Commissioner for review.

Project Star

Implementation of a managed care financing mechanism to sustain a financially integrated community-based service delivery system for children with mental health needs who are currently in or at-risk of out-of-home placement. NH STAR has been awarded a second year of funding from the Endowment for Health. Year II will continue to coordinate transition services for youth in residential placement, and their families, and will also coordinate services to youth at imminent risk of residential placement. Twelve families have been engaged in the project. A recently awarded SAMHSA grant will enhance this project with an emphasis on blending funding across child-serving agencies. Plans are underway to explore the provision of wrap around services through the use of 'blended funds' under a managed care environment in Step 2. It is anticipated that funds from the Department of Education, BBH, and DCYF would be blended to fund these services.

Facilitated Social Security Applications

State cash assistance to individuals with disabilities is 100% general funds. When these clients also receive Social Security disability cash benefits, the State dollar share drops significantly. The Division of Family Assistance ensures that clients applying for disability cash assistance follow up on their requirement to apply for Social Security disability benefits. Before this initiative began, 32.1% of APTD clients did *not* have SSA income. Today, that has been reduced to 27.2% who do not have SSA income. This saves \$183,471 in General Funds each month, achieving the savings anticipated in the budget.

Front End Operations & Consolidation of District Offices

The budget directs DHHS to pursue operating and service consolidation initiatives, in an effort to improve service delivery, obtain operating efficiencies, and promote the well-being of the state's citizens. This includes changes in ways to accept and process applications for services and a savings in field staff through attrition. This project is currently underway. To improve our long term care eligibility processes, the DHHS now centralizes and assures that medical and eligibility applications are completed in parallel.

Initiatives to improve access to services statewide include the completion of the NH Easy on-line web application initiative, through which residents throughout the State can apply for benefits on-line from any computer that has web access. This new application process allows clients to create their own user accounts to track and manage all

Department of Health and Human Services Attachment To Monthly Dashboard Current Status of Significant Transformation Initiatives December 2011

aspects of their applications. In December, 1,520 applications came in through NH Easy, representing 16.56% of all applications. Outreach efforts continue. A major efficiency is that NH Easy allows clients to screen themselves for eligibility before they actually apply for benefits, a significant time saver in that DHHS workers don't have to process applications and conduct interviews with people who screen themselves out. In December, for instance, 1,491 of the 1,804 people who used NH Easy screened themselves ineligible for cash benefits.. Total applications for the month would have increased by 20% had these individuals actually applied

Initiatives for early 2012 include 1) allowing clients to submit redetermination applications online; 2) allowing clients to report income and other changes online; 3) pre-populating client re-applications when they reapply and are known to the system; and 4) installing up to five "self service" kiosks in district office waiting rooms.

Consolidation of contracts

Savings have been budgeted related to consolidation of the number of contracts. This is intended to reduce the administrative costs associated with the processing and approval of state contracts, minimize expenditures in areas other than direct care and assistance to the persons in need served by the department, mitigate, to the extent possible, the negative effects of reductions in budgets and services, and create an efficient, effective and stable community system of health and human services agencies for the future. An integral part of this initiative is the centralizing of certain contract functions away from program divisions to a centralized contract unit. This reorganization will be announced shortly and will be followed soon thereafter by the contract consolidation plan.

Transformation of Service Delivery Systems

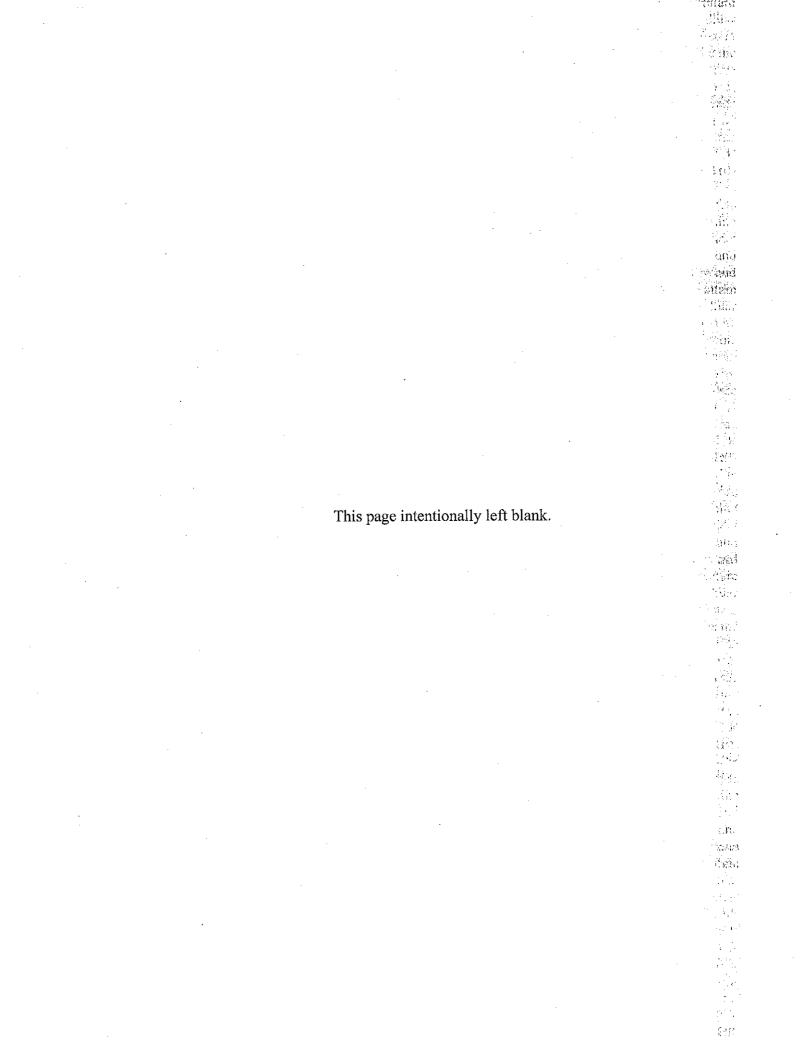

The Department's human service delivery system is complex, lacks an ability to assure coordination, and could be more focused on client needs. The Department is designing a new service delivery model of care that bridges client services gaps and fully integrates its non-Medicaid specific programs and services. An essential element in this process is a software tool that provides a client-centered and integrated data management. RFP 2012-081 has been released to procure a Data Repository and Analysis tool and associated analysis, design and planning services the Department's Service Delivery System Transformation initiative and responses are due by January 20, 2012. Subsequent work will assess current culture, values and norms that assist or detract from intra departmental coordination of services and to develop a business process design with inter-divisional workgroups that are accountable for seamless and strategic integration of services.

Health Information Exchange

Implement Phase 1 of the HIE capability for New Hampshire. The Department has received an award in the amount of \$5.5M from the American Recovery and Reinvestment Act of 2009 (ARRA), Title XIII – Health Information Technology, Subtitle B – Incentives for the Use of Health Information Technology, Section 3013, State Grants to Promote Health Information Technology. The purpose of the award is to promote the establishment of Health Information Exchange (HIE) that shall advance mechanisms for information sharing across the health care system. A Strategic and Operational Plan for the HIE was developed through the collaboration of stakeholders from across New Hampshire's health care community. Pursuant to Chapter 232 (HB 489), Laws of 2011, the New Hampshire Health Information Organization was formed that is establishing a HIE within the state.

Child Support System

Develop an architecture and planned migration of NECSES from its current, outdated platform. The plan, subject to Governor and Council approval, will consists of a modular approach to include 1) assist in maintaining, and when necessary, developing new functionality in the existing NECSES; 2) upgrade NECSES functionality and technology with modular steps; 3) assist the State in carrying out the upgrade plan after approval; and 4) maintain the enhanced NECSES including reporting and contact center components after completion of the modular upgrade plan.
